EDUCATION

Toronto Metropolitan University

Toronto, ON

Bachelor of Engineering, Computer Engineering

2023–2028

- **Relevant Coursework:** Digital Systems, Advanced Algorithms, Object Oriented Programming, Operating Systems, Signals and Systems

EXPERIENCE

Vice President of Events

Aug. 2024 – Present

Vision4All TMU

Toronto, ON

- Led **campus-wide fundraising and awareness initiatives** reaching **200+ students**, coordinating planning, execution, and team operations across multiple events
- Built **Excel dashboards and tracking systems** to monitor fundraising performance, donor engagement, and campaign progress, helping the team make more informed outreach decisions
- Worked with executive members to identify workflow gaps, improve internal processes, and prioritize initiatives based on organizational goals and available resources

Technical Systems Engineer

Oct. 2025 – May 2026

Air Hawk Solutions

Oshawa, ON

- Collaborated with a **20+ engineer cross-functional team** developing autonomous drone systems, contributing to technical planning, feature decisions, and system testing workflows
- Built **Python-based AI data pipelines** using sensor data from LiDAR systems, processing **1,000+ readings per second** to support real-time drone analysis and validation
- Developed monitoring and reporting tools that transformed raw testing data into actionable insights, helping engineers identify performance issues and improve development workflows

Competitions Organizer

May 2025 – May 2026

MIST Toronto

Toronto, ON

- Coordinated competition operations supporting **1,600+ students and 100+ judges**, managing scheduling, logistics, and communication across multiple teams
- Created **Excel and Google Sheets systems** for tracking scores, schedules, and event information, improving visibility and reducing manual coordination efforts
- Resolved real-time operational challenges by working with judges, volunteers, and organizers to balance competing priorities during large-scale events

Fundraising Organizer

Jun. 2026 – July 2026

Durham Employment and Newcomer Centre

Ajax, ON

- Developed **Excel-based reporting systems** to track fundraising performance across **100+ donor and sponsor relationships**, improving visibility into campaign progress
- Analyzed donor engagement data and campaign trends to identify opportunities for improving outreach strategies and prioritizing fundraising efforts
- Prepared reports and maintained campaign documentation to support decision-making across fundraising initiatives and internal teams

TECHNICAL PROJECTS

TypeForge – AI-Powered Typing Test | *React, TypeScript, FastAPI, Python, Groq API, Llama 3.3*

- Identified limitations with traditional typing tests and built an **AI-powered platform** that generates personalized typing passages based on user-selected topics and interests
- Designed and developed a full-stack application using **React, TypeScript, FastAPI, and AI APIs**, focusing on creating a faster and more engaging user experience
- Integrated generative AI capabilities to dynamically create customized content, demonstrating product development from problem identification to implementation

TECHNICAL SKILLS

Product Management: Product Strategy, User-Centered Design, Feature Prioritization, Requirements Gathering, Cross-Functional Collaboration, Agile Development

Project Management: Project Tracking, Scheduling, Budget Management, Workflow Improvement, Stakeholder Communication, Team Coordination

Data Analysis & Reporting: Microsoft Excel (Pivot Tables, XLOOKUP, Dashboards, Forecasting), Google Sheets, Data Visualization, Performance Tracking

Programming Languages: Python, Java, C, C++, JavaScript/TypeScript

Technical Tools: AI/ML Pipelines, Process Automation, Technical Documentation, Data Processing, Performance Monitoring

Professional Skills: Problem Solving, Communication, Process Improvement, Collaboration, Decision Making
